## AT A GLANCE

This introduction to City Dental College speaks of those things which make up City Dental College's personality, commitment to quality academic programs & facilities, opportunities for personal involvement both in education & campus life and a rich diversity of people and ideas. Every educational institution claims to have quality to provide personal attention. Exactly what that means, however is sometimes more difficult to discover, the evidence of it's personality rests on more than just claims. Now you need to decide if your personality matches ours.

You are welcome to take a closer look.

Welcome to

City Dental College.

### College Profile :

The college was established in 1995 and started its journey to glory on 13th May, 1996.

### First Batch Started Class :

13th May, 1996

### Course offered :

Bachelor of Dental Surgery (BDS),  
University of Dhaka.

## Few Words from the Chairman

Bismillahir Rahmanir Rahim

I am grateful to Almighty Allah for giving me strength to establish this college and also help me in running this College for 23 years entwined with glory and success.

This College is approved by the Ministry of Health & Family Welfare; Government of the People's Republic of Bangladesh. It is affiliated with University of Dhaka and is recognized by Bangladesh Medical & Dental Council (BMDC). It has an agreement of academic co-operation with Niigata University, Japan and Hokkaido University of Health Sciences. A Good Number of our graduates are currently pursuing Ph.D. courses in Hokkaido University, Japan, Tokio University of Japan, North South University of Japan, Many of our graduates are now working USA, Australia, UK, Soudi Arabia, Dubai, Gambia, South Africa, Japan, Malaysia & of course Nepal and other Countries.

Our College puts maximum emphasis on education and I can say very proudly that our students are good, keen and sincere in their studies. The best thing about an institution is to be able to kindle the fire of desire for learning, in the hearts of its students. I believe that our College has so far achieved this goal.

Besides education, arrangements are made so that the students can participate in debates, cultural activities, indoor games, seminars, international symposium etc. So far the achievements in these fields are also worth mentioning.

The College is doing its best to help the students. Now it is the students who have to help themselves by remaining disciplined and studying very hard. They must remember that "God helps those, who help themselves". If they want to do something and work sincerely, nothing can refrain them from achieving their goal. I believe in goodness of the soul and power of the mind and it's my firm conviction that a student is always good but the system makes him do untoward things. If our system is good our students will come out with flying colours every where they go.

The best way to accomplish a thing is to put in one's best efforts. I request the students to put in their best efforts for achieving their goal. I urge the students to look at their self image every night before a mirror and ask themselves if they have passed the day with fruitful activities. If the answer is in affirmative, then it is certain that they are going to make themselves extremely successful in life.

**Prof. Dr. A.S.M. Badruddoza**

MBBS (DMC), M. Phil (D.U), MPH (D.U)

Chairman & Project Director

City Dental College  
Principal

Prof. Dr. Mostaque H Sattar BDS MCPS FICD (USA) FICDDE (Singapore)

With best wishes,

Let us join hands in imparting education to our students for creating a better world.

We inspire children to achieve their full potential through passionate teaching that develops confidence, curiosity and independent learning within a safe, supportive and inclusive environment."

All undergraduate, domestic and overseas students may reside on the campus and thereby get full opportunity to participate in co-curricular and extra-curricular activities leading to a holistic personality development.

We welcome the upcoming students to the portals of this great educational institution and wish them a memorable, meaningful and rewarding tenure and emerge as world-class dentist or scientists. I would urge upon them to prove as good human beings and worthy citizens of this great country, Bangladesh. The senior students are welcome back to the new academic session with renewed vigour and dedication. I welcome everybody to see our impressive campus at Nikunja Dhaka adjacent to hotel Le-Martidan.

Apart from academic activities, the co-curricular activities, sports, adventure, cultural and social-service activities, form important parts of the life of the students. This importance is well indicated in the spread of facilities at the campus. There is a full-fledged medicine club, the blood donation Club, a very active Cultural Society and one of its kind, the Institute cricket Club, in addition to the regular facilities. Our scientific journal is unique, 7 international editors continuously contributing in our journal. Every Sunday we have seminars for clinical students and trainee doctors. We organize hands on courses once in a month.

CDC has a rich Alumni base that has significantly contributed in the nation building process. The Alumni of the Institute have done exceedingly well in all spheres of life at both national and international levels and brought name and fame for themselves as well as to their Alma Mater. The Institute takes pride in their achievements.

As of now, CDC has 15 academic departments offering BDS courses. Admissions to the Under-Graduate courses are made through a nation-wide Joint Entrance Examination organized by the Ministry of Health, Government of Bangladesh and mandatory Internship is the uniqueness of the course. In the Academic Session 2017-18, we had a total student strength of 75 (including 38 overseas scholars), faculty strength of almost 97 and a support staff of about 34. The faculty of the Institute is encouraged to undertake sponsored research and health service consultancy and always looks forward to a healthy and productive interaction with the common people.

It gives me immense pleasure in welcoming, on behalf of entire campus community of the City dental College, the new entrants to this historic institution. The Institute has a standing of about 23 years, has its roots in the dentistry, laid the foundation of modern dental education and the use of health service development of the country. CDC has rich heritage of past and has its standing as one of the best dental educational Institute in the country. The rich traditions of this historic institution combined with the brand equity of the service system have produced an institution par excellence in CDCH. I invite you to experience the unique environment at CDC, which is a blend of tradition and modernity and is evolving continuously.

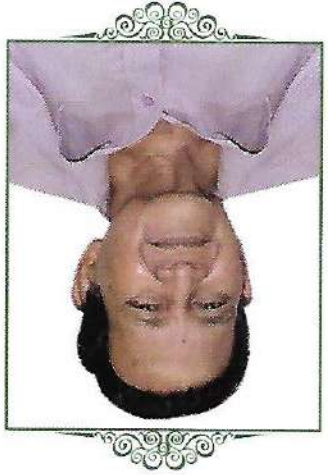

A well formed mind will be able to meet the aspirators of the society and make this world a better place to live in. We, at City Dental College, inculcate the system of education in order to make our students a powerhouse of energy, an ocean of knowledge but also a temple of love and compassion.

Assalamuhalikum,

Message from the  
Principal

### Few words from the Desk of the Rector

The duty of health sector community is to serve the humanity. Dental Surgeons are one of the important parts of this community. I hope the students and those who have graduated from this college should remember this and serve the community. I also wish that they should attain sufficient knowledge and standard to reach their ultimate goal.

**Prof. (Dr.) N.I. Khan**

MBBS, MRCP (UK)  
FRCP (London), FRCP (Edin)  
FRCP (Glasgow), FACP (USA)  
Rector, Professor & Head of the Dept. of Medicine  
City Dental College & Hospital

## Few words from the Desk of the Supernumerary Professor

It is my great pleasure, prestige and privilege to welcome the new batch of BDS students at City Dental College.

City Dental College is established with a great hope to have efficient knowledgeable doctors to serve our people with utmost sincerity. College administration is always ready to extend their wholehearted support and assistance to the students to make their stay in the college comfortable and peaceful and ensure a comfortable environment for study. We shall make every effort to provide quality education so that students not only become good doctors but good human beings too.

My best wishes to you all. Allah Hafez.

### **Prof. (Dr.) Md. Emadul Haq**

BDS (Dhaka); D Orth. RCS (England)  
FCPS Hon. (BD); FICD (USA); FWFO (USA)  
Supernumerary Professor  
City Dental College & Hospital

## Message from the Honourary Professor

It is my great pleasure to know that City Dental College is going to publish a new prospectus for new academic sessions. I am deeply honored for giving me the privilege to write something for this special publication.

As far I know total number of dentists in Bangladesh is still under border line. So, Bangladesh needs to make new dentists for resolving the scarcity of dentist for maintaining the oral health of mammoth population. At the same time, quality of the dentistry education should be considered in policy making level. City Dental College has been playing a significant role since its beginning in this aspect.

I believe, City Dental College authority will continue their effort for further improvement in the coming future. I am looking forward to seeing the glorious achievement of City Dental College in new academic dimension for facing the challenging demands of new generation.

**Prof. Takashi Saito**

Head of the Department and Chairman  
Division of Clinical Cariology and Endodontology  
Department of Oral rehabilitation,  
School of Dentistry,  
Health Sciences University of Hokkaido, Japan.  
&  
Honorary Professor

Message from the  
Asst. Project Director

"Oral health for healthy life"- was the slogan of WHO for the year of 1994. To ensure good oral health we need qualified dental surgeons. To produce qualified dental surgeons we need good dental colleges. City Dental College is considered the best among the private dental colleges. In a country with 160 million people where there is one dental surgeon for every 1,50,000 peoples. There is a huge scope to make career in dentistry. As a result the field of dentistry is flourishing; more and more students now want of make their career in dentistry. But unfortunately there is not enough quality dental college to meet the need of this modern generation. City Dental College can proudly but with modesty boast to be the privileged institution that can meet the need of the new generation dental college. I welcome you all to City Dental College.

City Dental College started its 1st session in the year 1996 and there after it has passed 23 years of its glorious journey to success.

It is also the best college for the students as we allow them to work and patients directly from 3rd years of their curriculum. It is the most popular dental college in the country and we promise to keep this up.

**Dr. Meghdeep Badruddoza**

B.D.S (DU)

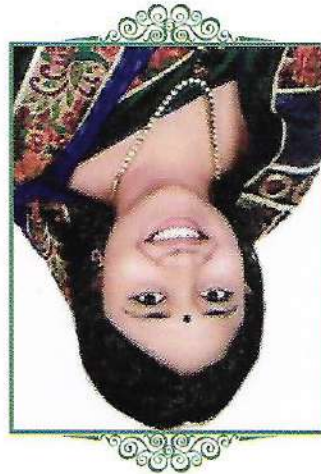

Asst. Project Director &

Lecturer

Dept. of Periodontology & Oral Pathology

City Dental College & Hospital

Message from the  
Academic Director

In this college a student has to face more than eighty examinations each academic year. A chapter is taught and then on this portion the student faces an examination. In this way a student gets prepared slowly and steadily. So, in the long run the big syllabus does not become a burden for the students. The whole syllabus is divided into six to ten cards which must be completed by the students in due time within the academic year. Before facing the University examinations student has to face two college examinations, which are replicas of the University examinations.

To overcome shyness and to make them good speakers we have seminars, which are arranged and conducted by the student. In each seminar new speakers have to participate.

To develop the leadership spirit and efficiency of the students we have the system of duty student, two from each batch, who convey the student's problems to the administration.

On the opening year, in the University examination most of the first ten positions were occupied by our students and till date our students are securing places (with honors marks) in the merit list of the University examination results. I am grateful to Allah for helping us to pass these years successfully. I hope and believe that the coming years will invariably be better in all respects.

**Dr. Akashlynn Badruddoza**  
Oral & Dental Surgeon  
BDS (DU), Ph.D.  
PG. Cert. Periodontology  
King's College London, UK)
